

Develop Your GuitEAR - The Rhythm Sessions

Rhythmic Beat Error Detection

Rhythmic Beat Error Detection will help you to;

- More accurately identify strum patterns so that you can hear your own rhythmic errors when practice guitar, this helps you improve your practice to play rhythms on guitar tight and in time
- Be able to spot inaccurate tabs or sheet music that have mistakes in them so that you can work out what you need to figure out by ear
- Associate sounds that you hear with the rhythms that you see on paper so that new music is easier to learn

The unique benefit to practicing beat error detection is building confidence in your own ability to hear rhythms correctly, play rhythms with self-awareness as well as improving your ability to read and comprehend rhythmic notation.

In the audio examples provided you will develop this skill by using the process shown in the table below. **If you are brand new to writing rhythmic notation, you may write your answer as a number. For example, if you can hear that beat 3 has a different rhythm than what is written you can write the number 3 for your answer.**

You will hear four counts of a metronome to establish the beat	You will hear a rhythm you need to figure out, this is deliberately different from the rhythm written on your page	You write down on the pdf work page the rhythm that you hear	You will hear the rhythm example for the second time	(Optional) Correct any mistakes you think you may have made	← After you have done this for all examples check the answer page provided
--	--	--	--	---	--

For this exercise refer to the provided pdf, the exercise is not about writing the correct rhythm, it is about correcting somebody else's incorrect rhythms.
